Yes, I used the data that was posted on the public page and created feature layers in the GeoPlatform, then added to the map.

Looping in EOC GIS-data folks to help so that I don't misspeak. However, if you're asking if this is pulling from public data, it is. It's the data we have posted on this page.

Dan,

Mellissa Harrison showed me the viewer that was posted on the HQ website and said you would know the background on the viewer. I am working as the EUL supporting the Area Command and R8 IMT and was wondering which data is population this viewer and is this from OEM? It appears that it's a mapped spreadsheet but I wanted to make sure.

Thanks

Dan
